DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 6, 9, and 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cutter (US 3,967,336) in view of Frederick (US 2,898,613).

Cutter discloses the invention substantially as claimed except for a first positioning pin wherein the first positioning pin penetrating a hole on the handle member and a hole on the shaft. Frederick teaches a handle member being secured on a shaft by a pin (e.g., 23) through holes on the handle member and the shaft. It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a locking arrangement as taught by Frederick on the device of Cutter in order to removably secure the handle member on the shaft. It is noted that position of the handle member and the stopper of Cutter are capable of being exchanged since both are removable.

3. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cutter in view of Frederick as applied to claim 6, and further in view of Chen (D489,763).

The modified device of Cutter discloses the invention substantially as claimed except for hexagonal posts and hollow hexagonal ends. Chen teaches a hexagonal post engaging a hollow hexagonal end. It would have been obvious to one having

ordinary skill in the art at the time the invention was made to employ a hexagonal post engaging a hollow hexagonal end as taught by Chen on the modified device of Cutter in order to interlock the handle and the stopper with the shaft to facilitate positioning of the handle and the stopper on the shaft.

Response to Arguments

4. Applicant's arguments with respect to claims 6, 9, and 11-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
